

诸葛神码 Gemini CLI 使用指南

配置步骤

1. 谷歌 Gemini CLI 安装

参照 Google Gemini CLI 官方文档（<https://github.com/google-gemini/gemini-cli>）先安装登录

- 1. **Prerequisites:** Ensure you have [Node.js version 18](#) or higher installed.
- 2. **Run the CLI:** Execute the following command in your terminal:

```
npx https://github.com/google-gemini/gemini-cli
```

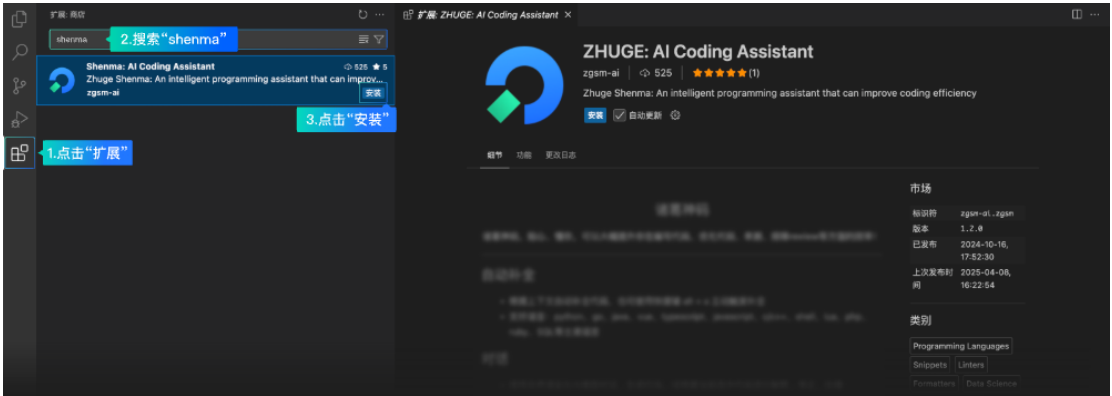

Or install it with:

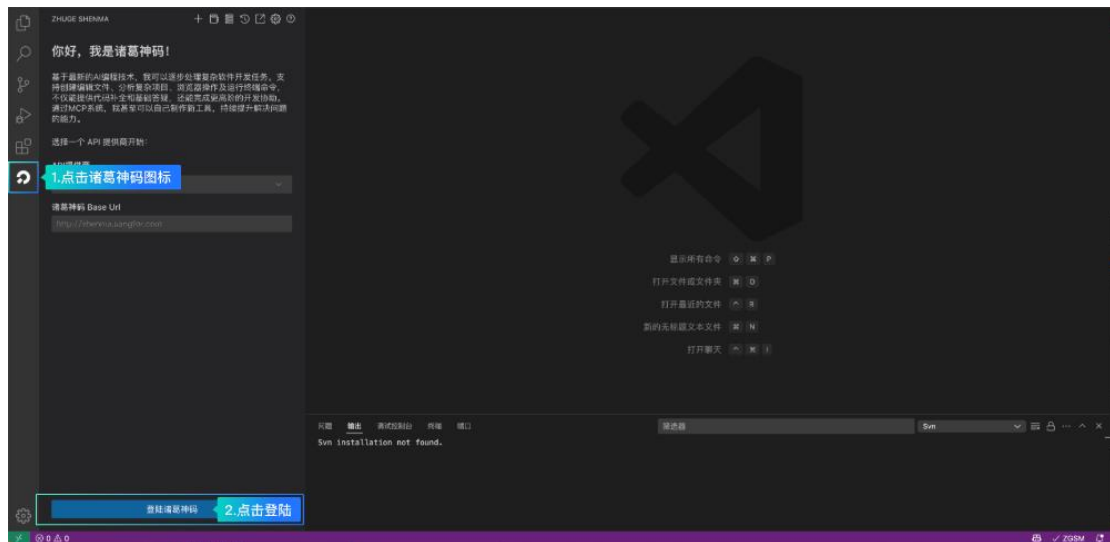

```
npm install -g @google/gemini-cli
gemini
```
- 3. **Pick a color theme**
- 4. **Authenticate:** When prompted, sign in with your personal Google account. This will grant you up to 60 model requests per minute and 1,000 model requests per day using Gemini.

2. 诸葛神码插件端使用 Gemini CLI

2.1 打开 VSCode 插件端，打开插件商店，搜索“shenma”，安装登录。

2.2 打开设置>API 提供商页面，API 提供商选择 Gemini CLI 点击完成即可。
